

Picture Piecing - Learning how to create realistic pieced pictures

The intention for this workshop is to make you feel comfortable designing your own project using the Picture Piecing technique. Come to have fun! It's not as hard as it looks. I have never had any student run screaming from my class!

In this workshop we will explore techniques of breaking up a design for machine construction. Color selection and shadow placement will be addressed.

I will provide a design packet of drawings for you to practice sectioning on. They will start out simple and gradually become more difficult. Do not be at all apprehensive, I have lots of helpful pointers.

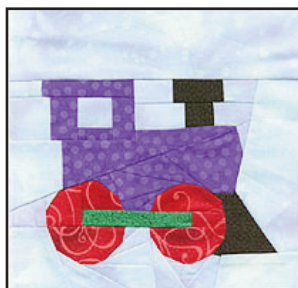

MATERIAL FEE \$15 payable in class....cash preferred

YOUR HOMEWORK.... Should you choose to do it

You don't really HAVE to do this, but you will get more out of the class if you do.

I have found that it is helpful to have sewn using the technique before learning the sectioning process. In class I will be doing a sewing demo to show you how it works.

IF YOU CAN....I have two free patterns online; an ice cream cone and a train engine. They are simple 6" blocks. If you are able to sew one of these beforehand, the sectioning process will be easier for you.
